

CIVIL AND CONSTRUCTION

MANAGEMENT SOFTWARE

FUNCTIONS

- Job Costing
- Contract Management
- Subcontract Management
- Plant Management
- Timesheets
- Procurement
- Estimating
- API Integration
- Cloud Based
- Audit and QA

We understand

Are you overwhelmed? The simple business you started a few years ago has now become a monster with a life of its own.

You know you have problems delivering projects but you are not sure exactly where you are going wrong. Jobs that look good from the outset end up costing you money and you spend many hours worrying about the outcome of your projects.

Your project team are all working hard but they are all doing their own thing, often in spreadsheets or a range of disparate systems which makes it difficult to get an overall perspective of how the business is doing as a whole.

Inefficient processes and double handling are creating work for your admin team and is costing your business money.

We can help

We have been delivering software solutions to the Civil and broader Construction industry since 1995, over 20 years of continuously learning of peoples problems and refining solutions to help them realise their goals.

Our management team has in excess of 100 years of experience dealing with project issues, to this day our most senior directors still get involved directly with clients and projects and their wealth of knowledge and experience is evident in the Workbench software.

We take pride in the fact that Workbench excels at managing projects where alot of other job costing systems simply run out of functionality. It is our ability to understand the detail and translate complex project management issues into easily usable software that has bought us many years of success.

We know how to help transform you into an effective and efficient business.

What is Workbench?

Workbench is management software designed to meet the day to day operational requirements of companies delivering projects. It is cloud based and designed to integrate to commonly used Accounting systems such as MYOB, Xero, Exo, MYOB Advanced.

The software is very functional and highly configurable meaning you can opt for a simple out of the box solution if you are a small business. Alternatively it can be extensively tailored to your requirements if you are a larger more complex business.

Workbench has been developed to enable project staff to take control of their projects and have confidence in their financial management whilst unifying the operational and accounting aspects of the business.

No more questionable project reports, rekeying of timesheets or end of month surprises. Real time visibility of project data is available any time you want it.

Is it right for me?

We have thousands of happy users across a number of industries including:

- Civil
 - Roading
 - Mining
 - Landscaping
 - Plumbing & Drainage
 - Painting
 - Boat Building
 - Smart Homes
 - Commercial Building
 - Residential Building
 - Electrical Contracting
 - Carpentry
 - HVAC
 - Consulting Engineering
 - Drafting
 - Building Surveying
- 
- A large, semi-transparent background image of a construction site. It shows a white excavator with its arm raised, working on a pile of dirt. The image is faded and serves as a background for the lower half of the page.

Civil Contracting

Estimating

Estimate quickly in Workbench using system maintained rates, alternatively integrate with specialist tools.

- Import schedule of works
- Integration with Excel Templates
- Catalogues
- Bill of Materials
- Quote register and revision history
- Reporting and analysis

Job Costing

Define your own Job Costing structures. Setup jobs the way they need to be managed independent of the Accounting system.

- Multiple company support
- Multiple Divisions / Profit Centres
- Job and sub-job Hierarchy (6 levels)
- Detailed Job Work Centres
- User Defined Costing Activities
- Multiple Billing methods

Contract Management

Manage your contracts concisely with all the information arranged logically in an easy to understand and navigate layout.

- Track Actuals vs Budget with comprehensive enquiries
- Price and Manage Variations
- Contract Claim and Schedule Management
- Track Retentions and Bank Guarantees
- Cost to Complete Forecasting
- Measured Job Progress
- Contract Cashflows

Civil Contracting

Subcontract Management

Reduce your reliance on paper files and complex spreadsheets to make managing subcontracts simpler with less chances of mistakes.

- Maintain scope of work and track variations
- Claim Certification
- Insurance / Certificate management and checking
- Retention Management
- Subcontractor portal option

Workforce Management

Manage your people more effectively, track their skills and qualifications and use the right people for the job.

- Timesheets / Mobile Timesheets integrated with Payroll
- Site Diaries and Crew Timesheets for Foreman
- EBA Award Interpreter
- HR Module for tracking skills / training / medical certificates
- Resource Scheduling and Productivity reporting
- Leave Management
- OH&S Checklists

Plant & Equipment

Protect the investment you have made in Plant and Equipment. Understand how it is being used to keep it running at its optimum.

- Budget running costs and track actuals
- Scheduled and reactive maintenance
- Meter readings
- Flexible and multiple costing rates per item
- Resource scheduling
- Mobile Pre-Start Checklists
- Utilisation reporting

- Modern intuitive user interface
- HTML5 mobile optimised framework
- SQL Server Database
- Fully open JSON REST API
- On premise or hosted
- Hosting provided via Amazon Cloud Services
- SSRS Reporting
- Integrates with most commonly used Accounting systems
